

**John Meiners**

Chief of Mission Aligned Services,
American Heart Association

"We were looking for someone who had experience in a global environment. Impelsys has been one of the few technology companies that actually has always delivered on time & budget with high quality; not requiring lot of reworking, or additional sprints to satisfy our initial scope and expectations. So, that has led to us investing in additional solutions and bring them into a partnership rather than just a vendor."

**Rachel Armitage**

Managing Director, RCNi

"With the launch of our RCNi Learning apps for Android and iOS, our learning modules are available both online and offline across a range of devices. We are thankful to the team at Impelsys for their vision and technical expertise."

**Alf-Christian Dybdahl**

CEO of Laerdal Medical

"The Software Development Center reflects our fruitful relationship with Impelsys. The center will be instrumental in our mission to help save lives through enabling technologies for time-critical emergencies. I am excited about the cutting-edge technology solutions that we will develop together. I look forward to a long-term partnership with Impelsys"

**Joseph Walker**

Director of Publications, ASABE

"We will be able to host and distribute our journals to multiple types of subscribers with the iPC Scholar 3.0. The platform will provide our customers with an intuitive user experience, easy navigation, and content discovery. With this launch, we are looking forward to migrating all our content and digital assets to the iPC Scholar 3.0 platform."
