BRIDGE
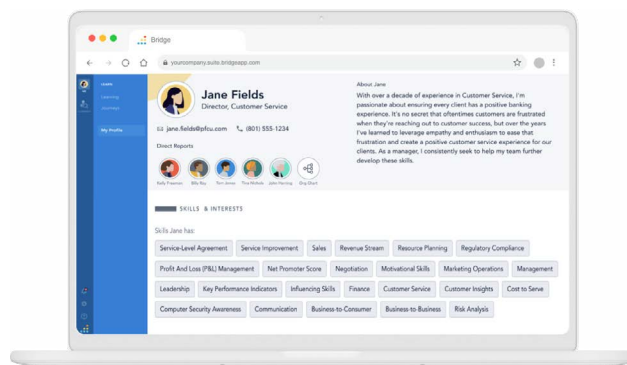

NEW TO BRIDGE:

Employee profiles, org charts and skill communities
Research shows when you invest in skills development, employee satisfaction and business results skyrocket.
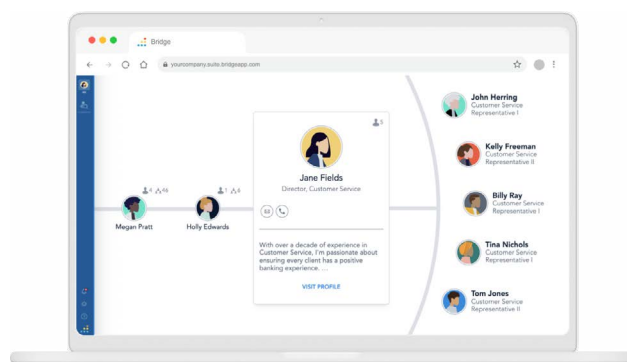

Share Skills in Employee Profiles

In Bridge, each employee can have their own profile personalized with their bio, image, skills, and interests. Individuals can highlight the skills they have—and are willing to share— and identify skills that they want to learn.
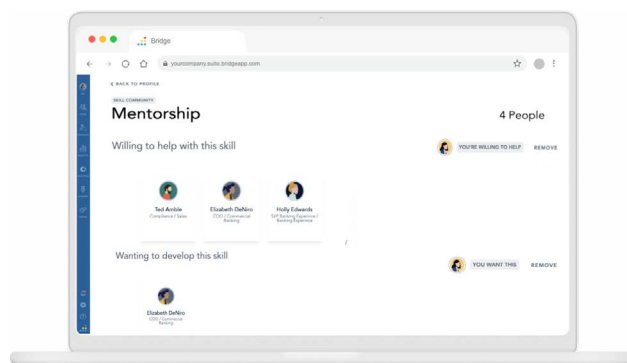

Bring Teams Together With a Directory and Org Chart

Share employee profiles in an interactive org chart and directory. Here, employees can learn about their colleagues, both personally and professionally.

Build Skills Communities

Foster community and make it easier for employees to find subject matter experts, mentors, and collaborators. In the directory, employees can find skill communities and see who is willing to mentor them on a specific set of skills.

Contact your Customer Success Manager or email support@bridgeapp.com to get started with profiles, org charts and skill communities at no additional cost.

COMING SOON: SKILLS PLUS

Bridge Skills Plus will feature market-leading Artificial Intelligence (AI) to help employees determine which skills will drive career growth, and recommend content that helps them reach their goals. Plus, it will save time and increase productivity for HR teams by auto-tagging skills to job titles and courses.
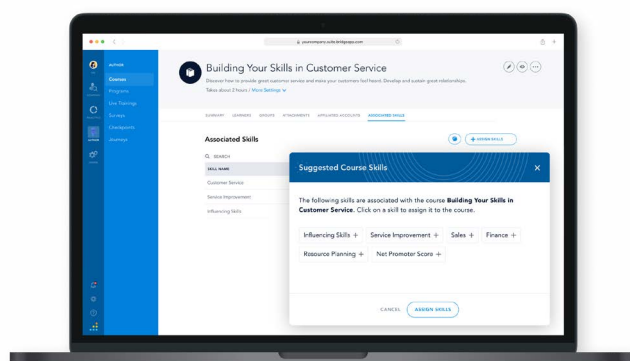

AI-Based Skills Suggestions
Skills Plus automatically recommends skills to employees based on their job title. Individuals will also see the skills they need to build in order to meet their career goals.

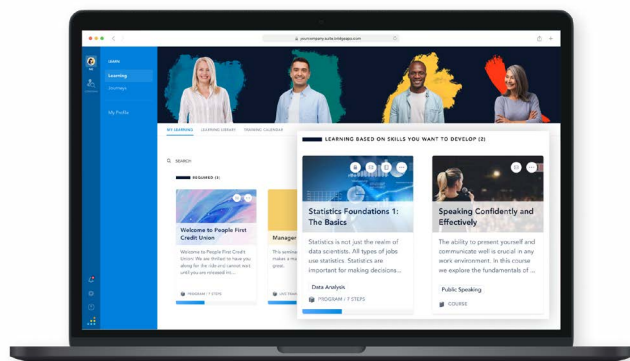

Courses Are Auto-Tagged With Skills
Skills Plus instantly scans thousands of courses and automatically tags them with the appropriate skills.

Skills-Based Learning Recommendations
Skills Plus introduces a dynamic, personalized approach that recommends the right learning to the right employee at the right time.

Develop Job Architectures and Skill Taxonomies
Skills Plus enables HR teams to leverage AI-based skill suggestions for job titles in order to build and maintain a dynamic and agile job architecture.

What can Bridge Skills Plus do for your organization?

Grow Your People, Grow Your Business
When your people have the right skill sets, it fuels your business. A smart, employee-centric platform with personalized developmental recommendations will drive engagement, increase productivity, and retain top talent.

Create Efficiency and Boost Productivity Through Automation
Leveraging AI increases productivity across the organization—including in the teams that administer your L&D programs. Efficiency and agility are key—especially in times of rapid change, when employees must upskill or reskill quickly.

Deliver the Right Learning to the Right Employees
Skills Plus allows organizations to ensure that their employees are receiving relevant learning recommendations that are aligned with their career aspirations and skill development goals.
