

Create and Deliver HTML5 eLearning Content, Inline with Evolve.

When content authors are faced with growing demands to produce beautiful and engaging learning content rapidly, they turn to the Evolve Content Authoring tool to get the job done.

Evolve is a powerful authoring tool, and is the easiest and fastest way to create stylish, professional, responsive HTML5 eLearning content, simulations, and courses — natively in the Intellum Platform.

Create better education content with Evolve.

Build a course (from a template, or from scratch), and use it across multiple use cases.

Complete **theming control** allows total customization of look and feel.

60+ ways to display content means your learners will constantly be engaged.

Live Preview allows you to view the content as your learners will, in real time, while you create.

Guide behavior using simulations. Mirror functionality with incredible accuracy to create product walkthroughs that better highlight new and existing features.

Educate & Assess - Introduce engaging content and simulated experiences, then test your user's knowledge before they use your products and services in the real world.

Evolve takes content creation time down from months to weeks/days.

Traditionally, eLearning courses are planned out on a storyboard in advance and then converted into eLearning content in a tool.

But with Evolve, you can use the **Course Builder** to add your content directly, while also easily reordering and repositioning content according to how it flows best, or based on feedback received.

Evolve makes it easy to scale content development teams.

Rapid iteration in a live-preview environment enables organizations to work at a fast pace and asynchronously, across any time zone delivering robust, trackable learning content.

Using Evolve increases learner engagement and learning outcomes.

Vertical scroll (vs old-school left-to-right pagination) leads to higher completions. It keeps learners engaged, and in a flow state, where they want to keep progressing through each stage of a course. Our data shows when Evolve is used in the Intellum Platform, learners complete inline Evolve content over **90%** of the time.

**Our research shows that learners complete Inline
Evolve content a staggering 90.3% of the time.**
