Training Video Library

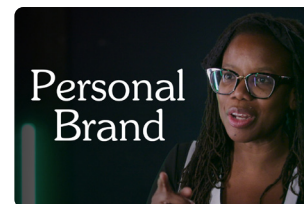

Learn from the best with thousands of award-winning training videos on the most in-demand software and power skills

Intelleyz offers a robust training video library with thousands of videos comprising hundreds of courses focused on the most widely used software, including M365, Google Workspace, and Adobe Creative Cloud, as well as must-have power skills. Our expert instructors remain on-screen for the duration of each video, engaging learners with a face-to-face experience. Our videos are consistently updated to remain current with the latest software updates, and nearly all our videos are available in 20 languages through on-screen captions. Our videos help drive the adoption of new technology, support digital literacy, narrow skills gaps, and allow you to maximize the full value of your company's investment.

AR & VR Learning Solutions

Take your Learning & Development offerings to the next level

With virtual reality (VR) and augmented reality (AR) solutions from Intellezy, we partner with you to create a blended learning solution that includes eLearning, video, VR, AR, and more. **Virtual reality training** is an exceptionally effective piece of any blended learning experience, offering learners the opportunity to immerse themselves in simulations that help them learn and practice job-related skills in the safety of a virtual environment. **Augmented reality training** provides a unique opportunity for learners to interact with an overlay of virtual objects onto the real world, also allowing employees to practice tasks or procedures in a safe and controlled environment.

A personalized approach centered on your vision and goals.

Custom eLearning Development

Our **custom eLearning development** helps you effectively train, upskill, and reskill your team, ensuring that you are maximizing the full value of your Learning & Development investment. With our knowledgeable group of Learning & Development experts and our in-house production studio team, we collaborate with your organization's leadership to develop expert eLearning content that is designed around your organization's objectives, tailored to learners' roles, and reflective of your brand. Our team of Learning & Development professionals are industry veterans who are well-versed in the latest instructional design methodology and leading eLearning development software, including Camtasia, Captivate, Articulate Storyline, Premiere Pro, and PowerPoint, as well as other rapid development tools.

Online Learning Platform

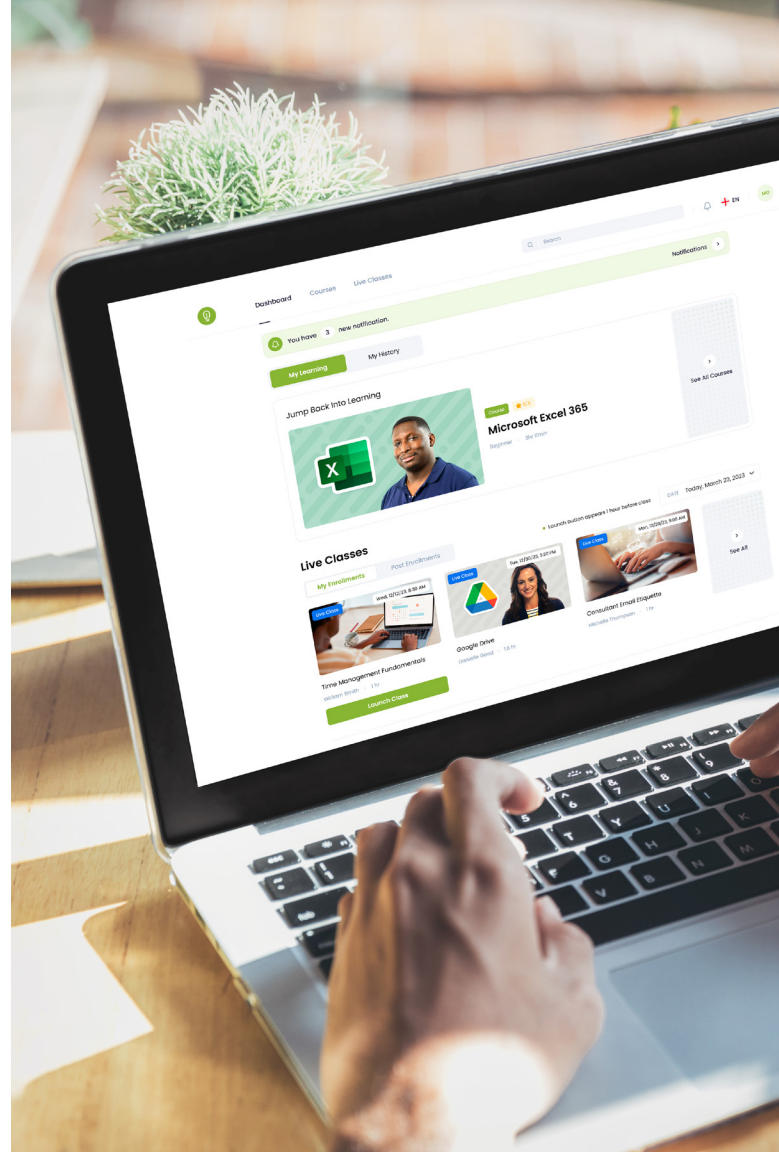

An easy-to-use platform that integrates into your L&D strategy

Our industry-leading platform is lightweight, flexible, and easy to navigate for both users and administrators, with a variety of valuable features. Our streamlined platform allows your learners to access our award-winning training video library, deliver your own proprietary eLearning content, or both. Additionally, our platform offers selective white-labeling to reflect your branding for a seamless learning experience.

Change Management

Embrace and accelerate change with confidence

We are living through a period of truly unprecedented technological and societal change, and with any change comes both challenges and opportunities. An increasingly hybrid and remote global workforce, coupled with advances in immersive tech and AI, have disrupted the global business landscape, requiring organizations to figure out how to remain competitive, innovative, and successful. Our **change management** practitioners work closely with your team to establish a plan for driving innovation and impact. Our end-to-end strategies are custom-tailored to your organizational goals and culture, helping you achieve your business outcomes no matter what the obstacles may be. Our comprehensive process creates buy-in at all levels of your team, whether you're revamping business processes, upgrading software, or implementing new technology.

Our professionals are experts in their field, embracing your company's culture and flawlessly integrating into your team.

Staffing

We provide staff augmentation services to help you advance organizational change and L&D initiatives without the need to hire full-time staff. Get access to accomplished and pre-vetted industry experts who seamlessly blend into your culture to help plan and build robust, full-scale programs or assist with executing an existing strategy. Our consultant roles range from high-level advisors and managers to instructional designers and support associates. Whether used in conjunction with change management and Learning & Development, or on its own, our staff augmentation services can help you establish a training department, augment a small team, or integrate temporary staff to achieve your goals faster.

Video Production Services

With our in-house production and dedicated studio teams, we offer custom Learning & Development videos for a personalized approach to eLearning. The expertly presented knowledge-and skills-based content in these professionally produced videos is specific to your company, helping your team learn to leverage new software in their everyday role. To support the eLearning videos, we also create excitement videos or sponsorship videos for organizations to help with communication when adopting new technology. By investing in customized video production for your organization, you can ensure that your learners are receiving all the information and support they need, while being able to better manage costs, distribution, and branding.
