## Create flexible content for all training situations with Rise 360

Improve knowledge retention with short-burst training that fits how humans learn. Our new microlearning feature in Rise 360 makes it easy to create bite-size learning focused on a single learning objective.

Tailor your learners' viewing experience with new navigation modes: Continuous and Stepped. Plus, get started in minutes with new microlearning templates designed to speed and inspire content creation.

With a range of fast, flexible authoring options, it's easier than ever to drive powerful learning outcomes with Articulate 360.

74%

74% of customers are creating courses faster with Rise 360 than with their previous authoring app.

Goal Setting

Next, help employees plan goals for the next quarter. These goals should be SMART and include short-term objectives for the specific duties in their current role.

Create accessible training for all learners with Storyline 360 and Rise 360

Accessibility standards and practices are evolving, which means the tools you rely on to create and deliver online learning need to evolve, too.

Rise 360 and Storyline 360 offer a rich collection of features that broadly support Web Content Accessibility Guidelines (WCAG) and Section 508 and are vetted by usability testers who rely on assistive tools like screen readers. Read more about Articulate's commitment to accessibility on our website.

When you create workplace learning with Articulate 360, it's easy to provide accessible experiences with features including:

- Screen reader compatibility
- Accessible text formatting
- Keyboard navigation support

- Alternative text
- Closed captions
- Course playback speed control

> **"**Accessibility is critical to everything we're doing at SAP today. No one should be limited in access to training because the training doesn't fit their needs.**"**

**Dave LeFevre**, Head of Product Learning Design at SAP
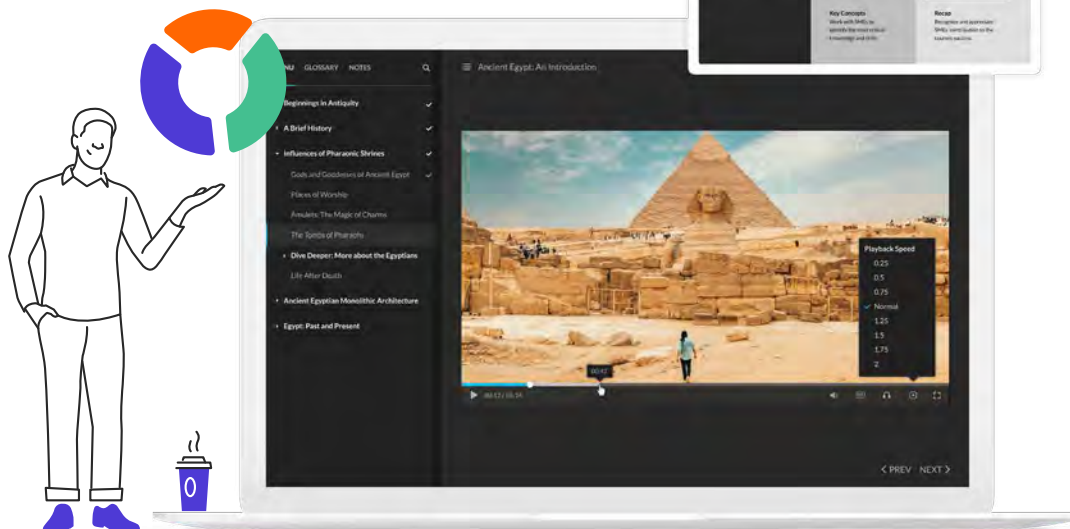

Create custom training in less time with Storyline 360

Optimize your workflow with new <u>Storyline 360 features</u> that make custom creation even easier.

- **Conditional trigger enhancements** let you define two actions for a single trigger instead of needing multiple triggers. Set up conditions to determine which action gets executed.
- The **enhanced color selector** lets you organize custom colors into different palettes to streamline your design workflow.
- With **feedback master defaults**, you can save development time by setting default slide layer properties for your entire project.

84%
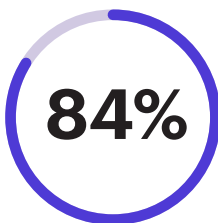

84% of customers are creating courses faster with Storyline 360 than with their previous authoring app.
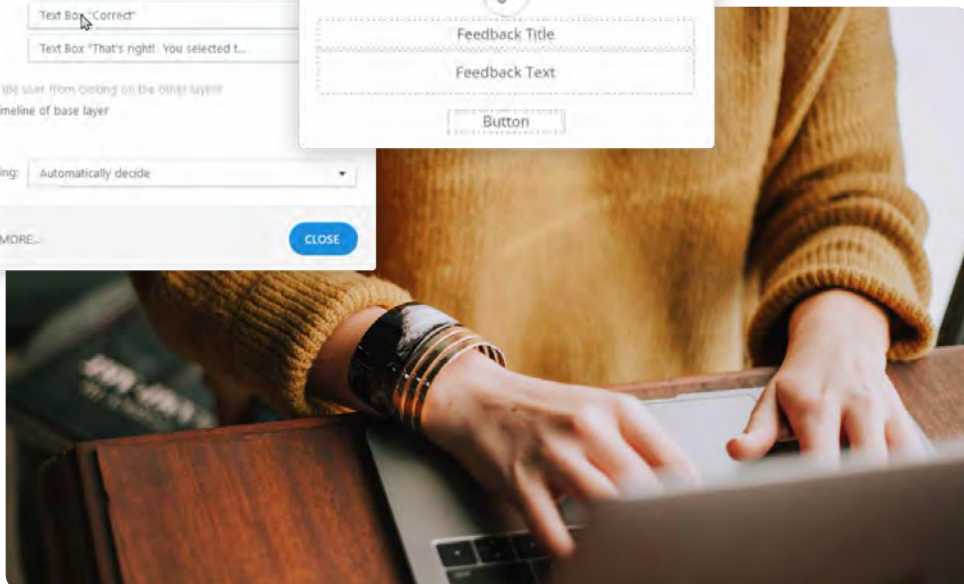

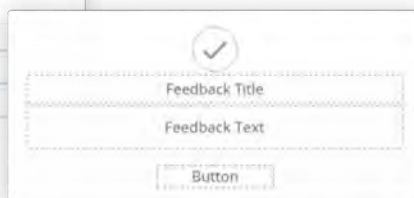

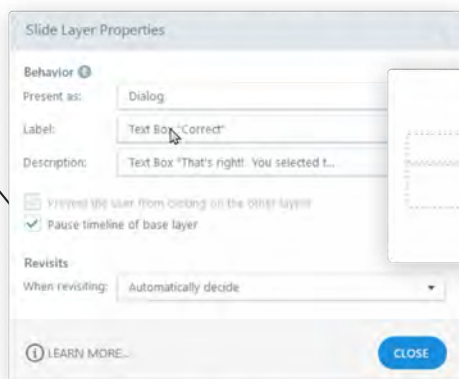

Create beautiful training that keeps learners engaged with Rise 360, Storyline 360, and Content Library 360

Whether you're an e-learning beginner or a pro, it's easy to create professional-looking training with Articulate 360.

Themes: Course creators in Rise 360 can choose from a variety of stylish themes created by award-winning designers to bring workplace learning to life. Customize courses with new options for cover pages, navigation, headers, colors, fonts, and more.

New Photographic Characters: Bring your learning to life with three new characters in Content Library 360: Aliyah, Sarah, and Thomas. Each photographic character comes in three clothing styles—casual, business casual, and corporate—that re°lect a range of work environments.

> "We've found that people really love the look and feel of what we develop with Articulate."

Curtis Poole, Avid

Create engaging video training with Storyline 360 and Rise 360

Coming Soon

Incorporate video into your training with new features coming soon to Rise 360 and Storyline 360.

- **Rise 360:** Combine webcam and screen-share clips to create custom video, then add it to content or publish directly.

- **Rise 360:** Apply layouts and backgrounds, do light editing, and add transition slides to easily customize video design.

- **Storyline 360:** Generate synchronized video transcripts from closed captions so visual content is accessible to all learners, including those who rely on screen readers, use Braille displays, or prefer to read.
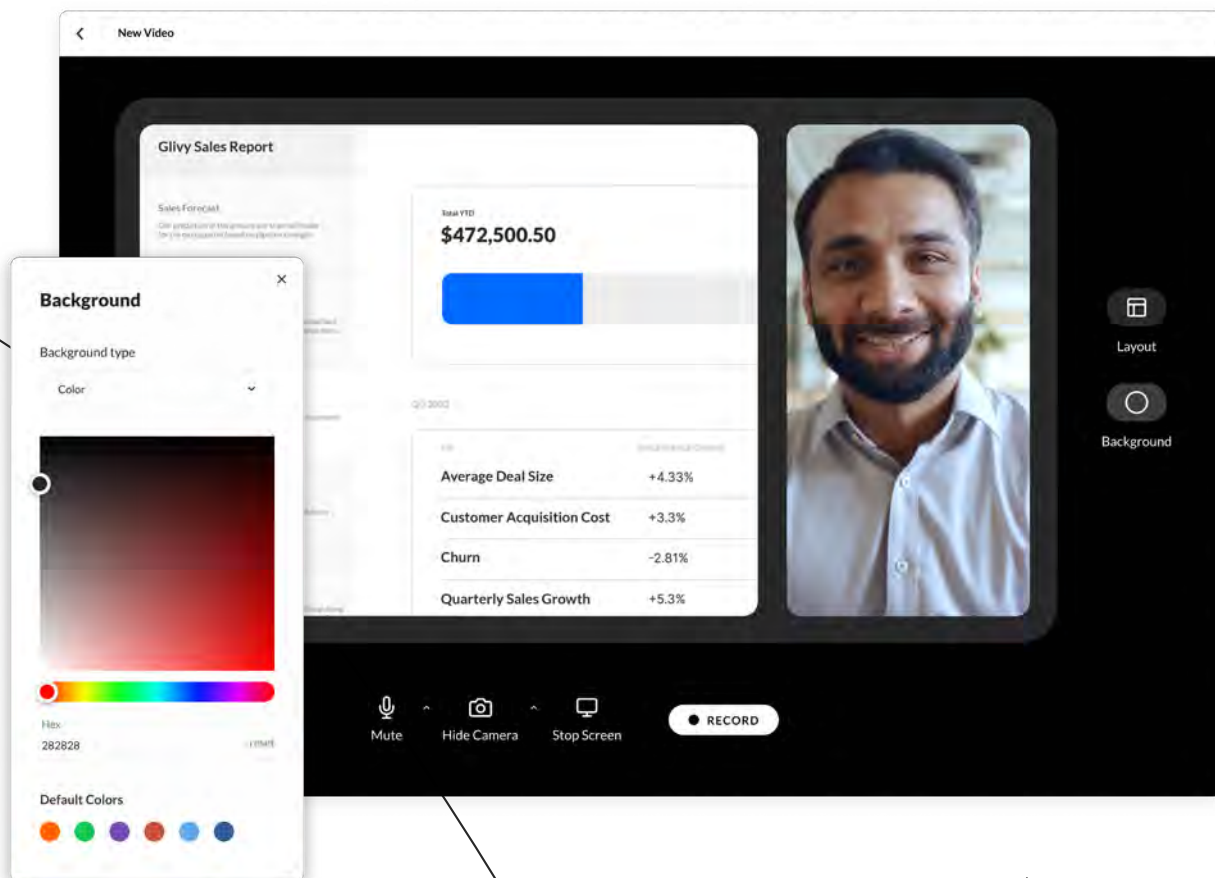

Our commitment to help you succeed with Articulate 360 Training and E-Learning Heroes

At Articulate, we understand your team might need help ramping up to the ever-evolving e-learning world—or you might have pros who need a helping hand on a complex topic. **No matter your experience, our subscription includes** underline robust training resources, **support, and community—all at no additional cost.**

Customers get unlimited access to 400+ live webinars each year from our world-class training team, led by industry expert, Tom Kuhlmann. Articulate is also home to E-Learning Heroes, the largest community of e-learning developers with over 1 million members.

> **"**The webinars are amazing. They teach you not only what needs to be done in the tool, but also what is best practice in the industry. Which for someone who is just starting up is essential!**"**
